

Telemotive

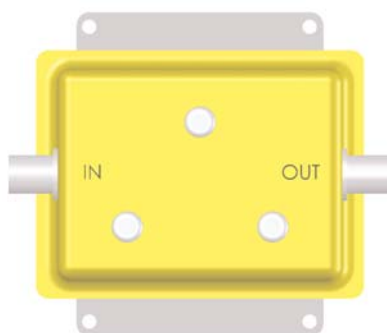

PLEASE NOTE: IMPORTANT TECHNICAL INFORMATION ATTACHED

Reference Telemotive Receivers:

- TR12
- TR16
- TR24
- 10K Series
- 18K Series

Your Telemotive radio control system has been furnished with a modified receiver. It includes an “add on” filter module designed to improve product performance. This filter reduces the potential of “off channel” signal interference. This filter is internally mounted to the receiver enclosure and in line with the antenna assembly. The part number for this component is #178-00749 and the diagram below reflects this modification to your system.
